Next Next Generation, is the album Title for iEARN's 2nd Compilation. This title derives its origin from a the 2007 World Bank Global Development Report, in which iEARN played a key role in research and documenting challenges youth face in gaining employment in Sierra Leone.

'Tamara Alexandra' iEARN Sierra Leone's previous intern from Australia observed that the music 'album has strong emphasis on issues of social justice, and human rights, with song titles such as 'Drug Abuse' 'Teenage Pregnancy' and 'Respect Woman'. Additionally, the young artist have been able to also show the positive things that they can their music is hoped at influencing attitudes and bring about positive changes in society.

Your presence is very important to us as it gives the young artist a reassurance that their efforts are recognized and that they too can make a difference. The PMP Team will release the album on November 24th on a commercial venture, with the hope of gaining support for their education through Patron donations, ticket and CD sales as well as generous pledges. This is indeed a platform for the youth to express their views through music to address important global issues.
